Original publisher: Tallahassee, FL : Southeast Eisenhower Regional Consortium for Mathematics and Science Education at SERVE, 2002. OCLC Number: (OCoLC)317118588 Subject: Global environmental change -- Evaluation. Excerpt: . . . A Personal Perspective The GLOBE Program is one of the most beneficial curricula developed to effect reform in science education. The collaborative part-nership between the University of West Georgia and the Georgia Institute of Technology as a statewide initiative has impacted innumerable students in school districts across the state. The implementation of the program has placed the concepts of authen-tic learning, student-scientist partnership, and inquiry-based peda-gogy into a pragmatic context. If we are to succeed in effecting reform in science education and fulfill the goals of Project 2061, science literacy for all Americans, If we are to succeed in we must develop curricula that provide the venue for students to effecting reform in become self-directed researchers and actively engaged in the learn-science education and fulfill the goals of Project ing process. We must also provide the professional development for 2061, science literacy for in-service and pre-service teachers for implementing standards-all Americans, we must based teaching and...
