Brand New Book ***** Print on Demand *****.Excerpt from **Designing Heating and Ventilating Systems: The Practical Application of the Engineering Rules and Formulas in Every Day Use, in Laying Out Steam, Hot Water, Furnace and Ventilating Equipment for Buildings of All Kinds**, Presented in a Simple and Easily Understandable Manner; Adopted From Lecture Co This book has been developed from a series of evening lecture courses given at several institutions, before audiences of varying experience and education in the heating line. It enters into the detailed use of exactly the same methods that the most proficient engineer uses in determining the sizes and proportions of equipment for everyday work and the problems that confront him for the first time. This basic engineering has been made so simple that salesmen and practical steamfitters have gained a sufficient grasp at the lectures without the careful study the reader must give to understand how to approach the solution of the problems that are presented by the many kinds of work involved in heating and ventilation. In all explanations the heat unit, foot pound and such measures of the engineer are so used that those who attended the lectures and gave their attention showed a marked proficiency in their use. The reader who will apply the information to work of which he knows something is expected to be equally benefitted and more experience and more frequent reference to the work will be sure to increase his proficiency. Its origin was inspired by the necessity of an up-to-date text book which would involve both the theoretical, as well as the practical side of the subject and one which would be really understood by the less technical mind. The theory...
