Psyche Zeitschr. Fur D. Kenntnis D. Menschl. Seelen- U. Geisteslebens (4)

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 118 pages. Original publisher: Golden, Colo. : National Renewable Energy Laboratory, 2006 OCLC Number: (OCoLC)177064777 Subject: Biomass energy -- Economic aspects. Excerpt: . . . Section 1 Process Selection Rationale requirements to the selectivity of the amine solvents. Attempts were also made to choose solvents that minimized net energy requirements. Water-Gas Shift and CO Removal 2 FT synthesis requires a H CO ratio of 2: 1, and methanol synthesis requires the following 2 stoichiometric ratio of H, CO, and CO: 2 2 (H - CO) (CO CO) 2 2 2 2 The syngas stream exiting the ZnO beds has a H CO ratio of 1. 7 and a stoichiometric ratio of 2 0. 89, which are inadequate for FT or methanol synthesis. A combination of water injection into the tar cracker, followed by CO removal in the amine unit, has been selected to adjust these 2 ratios. In methanol synthesis, H will react preferentially with CO over CO to form methanol. 2 2 This results in a significantly lowered methanol yield, greatly impacting the process efficiency. In FT synthesis, CO acts as a diluent;...

Reviews

These kinds of publication is the ideal pdf offered. It generally is not going to expense too much. I am just delighted to let you know that this is actually the very best book i have go through inside my very own life and might be he finest ebook for ever.

-- **Mabelle Schoen**

Great e book and beneficial one. It is amongst the most awesome pdf i actually have read through. You wont feel monotony at at any time of your own time (that's what catalogs are for relating to if you request me).
